Language That Cares is a collaborative effort led by TACT that aims to change the language of the care system. Language is a powerful tool for communication but sometimes the way that it is used in social care creates stigma and barriers for understanding. Language is power, and we want children and young people to feel empowered in their care experience.

Why has this language evolved? The reasons are varied but one respondent put it very well:

"Why we use these terms? It might be that it gives us a sense of control, reducing a complex situation into something that you can describe neatly and respond to or that it decreases our feeling regarding perceived risk, being able to name a difficulty or threat reduces the danger of an unknowable threat. It can offer a disguise for when we don’t know, or we don’t understand and defends us against an intolerable/unpleasant feeling.”
Professional

Language can be a weapon but it can also be emotional armour.

We have asked children and young people about their wishes and feelings on the day to day language used with, or to talk about, them and Language That Cares is their work.

Language That Cares is not an absolute list of all words used in the care system and does not represent everyone’s view. However, it starts a much necessary discussion about the way we communicate and engage with our children and young people.

Language evolves and changes and this is the ‘first edition’ of Language That Cares. We will all continue to consult with our children and young people about the language we use. We also hope that more Local Authorities and organisations will join us for future editions and, together, we can show our children and young people that we really care about them and about what they have to say to us.

I will leave the last word to some of the care experienced young people who created Language That Cares:

“The language of care is so mixed up with our everyday language that it is difficult to separate the two. These words that we challenge are used by everyone: foster carers, social workers, teachers, Independent Reviewing Officers, administrators and even children and young people. We should challenge ourselves and challenge people who we hear using them.”

I think the new dictionary of the words and phrases used by professionals like social workers is really helpful, because some words used in the care system can be really complicated at times. Professionals’ vocabulary would confuse me even when I was 15, I was still a bit puzzled by what was being said during my meetings, because it seemed to be all in some kind of professional, social worker code. Therefore, I can only imagine how confusing it must be for younger children to understand it all.

Professionals need to understand that not everyone speaks the same language as them, and for children it can feel complex and overwhelming, and sometimes even embarrassing, as there is a lot of stigma attached to some of the terms used by professionals.

Using alternatives to the word ‘foster carer’ is a good idea, because from personal experience I only referred to my carer by her name, or just saying my foster mum, because it seemed easier and it was more personal. Also, with regard to the term ‘care leaver’, I think changing it is really positive, because there is some stigma attached to ‘care leaver’, as it just feels like you’ve left care and that’s it, there is nothing else to you or your life. Personally, when I say to people that I’m a care leaver they kind of just think of me through the usual perception of what someone in care looks like, and it’s difficult to explain that it’s different for every care leaver.

I also agree with changing the word ‘peers’ to ‘friends’. When I was a child, my social worker would always call my friends peers, but I didn’t really know what peers were at the time, and I’d never really heard anyone use that word before.

In general the words chosen by the young people in the new dictionary are helpful but at the same time they could make it difficult for professionals, like social workers, who need to use professional language in their work. However, I believe social workers and other care professionals should leave the big words for other professionals who understand them, and adopt the words provided in the new dictionary when talking to both young people and children and make the language they use around them more accessible, clear and sensitive.

Difficult to place
We prefer: **Can’t find a home good enough for them; Failed by the system**

“The phrase ‘difficult to place’ blames the child for a failure of the system.”
Charity Social Worker

Drop out
We prefer: **Early school leaver**

Foster carers
We prefer: **My family; Foster Mum; Foster Dad; People who care about me; My new family; The family that chose us; Aunty/Uncle; Their name**

“The use of language is at a very individual level, so a term used for one child may not be right for another. Children use different words in different contexts, they may call foster carer ‘Mum or Dad’ in one situation but not in another. Foster carers and the children they look after need to work this out between them.” Foster Carer
